

# Using the Adventist Framework with your *netAdventist* Site

## Introduction:

The Adventist framework is available for everyone with a *netAdventist* web site. Sites using this framework will visually identify with Adventist.org and many other denominational sites, while maintaining their own unique elements. Switching to the Adventist framework is a great way to quickly make your old site look new again! It's a complete visual overhaul, and is available for free.

## Key Features:

- \* Beautiful new design that includes the Seventh-day Adventist logo and color scheme and matches Adventist.org
- \* Large locally supplied photos
- \* Option to include Beliefs and My Whole Life section that ties to adventist.org
- \* Responsive code that helps your site look great on everything from smartphones to big computer screens
- \* Configurable links to social media sites
- \* All the other features of *netAdventist* that you already enjoy

## CHURCH CAMPOUT

Last year's Church Campout was a huge success and a good time was enjoyed by all. This year we will once again be camping on Lake Beautiful. Bring your friends, family, pets and camping gear!

## MY WHOLE LIFE

I was born to reflect the image of a God who is powerful enough to create my universe, attentive enough to hear my prayers and loving enough to be defined by self-sacrifice. I find my greatest fulfillment on a journey toward purpose and wholeness.

## OUR BELIEFS

Seventh-day Adventist beliefs are meant to permeate your whole life. Growing out of scriptures that paint a compelling portrait of God, you are

Save and return

Widgets that you have configured for use with your existing theme and layouts may disappear when you switch to the new adventist.corporate theme. You may wish to make some notes about them before you switch themes. Don't worry, you can switch back to your previous theme if needed and they will re-appear.

Your work will be much easier, if you have a few nice images ready to upload and feature on the main page.

Visual Themes and Templates

Your current website theme:

Adventist.corporate v1.0

Change theme Download Theme

Required Extensions

Adventist ID Slideshows

Pre-loaded Widgets (on initial theme load)

| Widget                                   | From Extension | Widget Container | Template |
|--|----------------|------------------|----------|
| Slideshow                                | Slideshows     | Hero unit        | home     |
| Adventist ID - Living the Adventist Life | Adventist ID   | Callout large    | home     |
| Adventist ID - Adventist Beliefs         | Adventist ID   | Callout small    | home     |

Once you are ready to switch, navigate to the theme chooser and select the **Adventist.corporate** theme.

## 2. Site Name & Description

The first thing we want to do is make sure that your Site's **description** is not too long.

Let's start by navigating to the **Setup details** panel inside the **Settings** tab.

Take notice of the existing values for the **Site name** and **Description** fields for your site. The adventist.corporate theme expects a fairly short and succinct site **Name** and **Description**.

## 2. Social Media Links

The screenshot shows the netAdventist administration interface. In the top navigation bar, there are links for 'Welcome Dallas, Logout | Help | My Account | View Site | netAdventist terms of use'. Below this is a main menu with options like 'Dashboard', 'Website pages', 'File library', 'User admin', 'Email lists', 'News Desk', 'Store', and 'Settings'. Under the 'Settings' tab, a sub-menu is open for 'Social Networks'. This panel contains fields for 'Twitter URL:' and 'Facebook URL:', each with a corresponding input field and a 'Save' button at the bottom right.

Let's take a look at adding URLs to your site for **RSS Feed**, **Twitter** and **Facebook**. These URLs will become links next to the **search bar** in the **header** for the adventist.corporate theme. If you leave these blank, don't worry, the corresponding icon on your site will just not be shown.

Click on the **Social Networks** panel where you can put in values for your **Twitter URL** and/or **Facebook URL**. Click on the **Save** button to confirm your changes.

The screenshot shows the 'Website settings Setup details' panel. On the left, a sidebar lists 'Setup details' under 'Social Networks'. The main panel has sections for 'Site name' (set to 'Spritual Harvest Church'), 'Website url' (set to 'http://delta.gcnetadventist.org'), 'RSS Feed URL' (set to 'http://www.example.com/rss-feed.xml'), and 'Description' (containing placeholder text about the church). A 'Save' button is located at the top right of the panel, which is circled in orange.

Head back to the **Setup details** panel in the **Settings** tab and fill in a value for the **RSS Feed URL** field (if your site provides an RSS Feed). Click on the **Save** button to confirm your changes.

## 3. Adventist ID Widgets

When you initially load the adventist.corporate theme, it automatically turns on the **Adventist Life** and **Adventist Beliefs** widgets on your site's home page layout. If your site's home page already has the **My Whole Life** and **Our Beliefs** portions shown here, skip ahead to the next section, unless you wish to remove them.

| Widget                                   | From Extension | Widget Container | Template |
|--|----------------|------------------|----------|
| Slideshow                                | Slideshows     | Hero unit        | home     |
| Adventist ID - Living the Adventist Life | Adventist ID   | Callout large    | home     |
| Adventist ID - Adventist Beliefs         | Adventist ID   | Callout small    | home     |

If you do not see the **Adventist ID** widgets, you can manually put them in their place. Head back to the **Themes and templates** panel to get started.

Page templates for this theme:

Each content page on your site has an associated layout. The layout is a combination of widget containers and page-specific content. When your site is built, there are two templates built: 1) Home page template, and 2) Default template. The default template is the template used for every page other than your home page until you build another template here. Click on the dropdown and add the appropriate template, click edit, select your preferred layout, and place your widgets. For an in-depth explanation of how themes, templates and layouts work, [Click here](#).

Custom template for: Content Page(s) Name: Add a Template

| Template name | Layout details |               |

When the **Widgets** popup appears, find the widget named “**Adventist ID - Living the Adventist Life**” and check the box next to it to select it. Then click on the **Add widgets** button.

### 3. Adventist ID Widgets

Now we'll do the same for the **Widgets - Callout small** widget container. Click on its **Click here to add widgets** link to open the **Widgets** popup again.

When the **Widgets** popup appears, find the “**Adventist ID - Adventist Beliefs**” widget and select it by clicking on its checkbox. Then click on the **Add widgets** button once more and we’re all set!

## 4. Home Page Slideshow

A screenshot of a website homepage titled "Spritual Harvest Church | In the heart of Cosmopolis". The header features the church's logo and navigation links for Home, About, and Test. Below the header is a large, dark teal banner with the title "MY WHOLE LIFE" in white. The banner contains text about spirituality, vitality, and service, along with "Learn More" buttons. To the right of the banner is a sidebar with the heading "OUR BELIEFS" and some sample Latin text.

Now that your site's home page more closely resembles the image shown here, we'll create a **Slideshow** and insert it into the area above the 2 **Adventist ID** widgets using the **Slideshow** widget.

Alternatively, you could choose to use the **Banner Image Widget** to display an image the full width of the page. If you would prefer to use a full width image, skip ahead to the **Home Page Banner Image section**.

A screenshot of the netAdventist admin interface. The top navigation bar shows tabs for Dashboard, Website pages (which is highlighted with a yellow circle and labeled '1'), File library, User admin, Email lists, News Desk, Store, and Settings. The left sidebar lists various site management options. The main content area is titled "Slideshows" and displays a table with one item: "sidebar slideshow" (Title), "2" (Photos), "0" (Total Clicks), and a "Add to Template" link. At the bottom of the screen, the URL "https://delta.gcnadventist.org/admin/slideshows/new" is visible, with a yellow circle and the number '2' highlighting it.

To get started, we'll head over to the **Slideshows** panel in the **Website pages** tab. If there is no **Slideshows** menu option within your **Website pages** tab, make sure you have the **Slideshows** extension installed and enabled.

**New Slideshow**

**1 Slideshow Settings** **2 Slideshow Images**

Title:

Dimensions: Add the dimensions of the slideshow. Each image added to the slideshow should have the same dimensions. The width should be between 1 and 2500 and the height between 1 and 1500. Basically don't go too crazy with it and make sure it looks good in your theme.

Width:  px Height:  px [How big is that?](#)

Next Cancel

Doing so will bring up the **New Slideshow** 2-step creation wizard. In **Step 1 - Slideshow Settings**, we'll give our slideshow a **Title**, like "Home Hero Slideshow."

## 4. Home Page Slideshow

The screenshot shows the 'New Slideshow' configuration screen. The 'Slideshow Settings' tab is active. The 'Title' field contains 'Home Hero Slideshow'. Under 'Dimensions', the 'Width' is set to 739 px and the 'Height' is set to 457 px. The 'Next' button at the bottom right is highlighted with a yellow circle labeled '3'.

We also need to enter the **Dimensions** of the actual slide images. For the best look, go with **739** for the **Width** value. The **Height** value can be just about anything you want. We recommend **457** for an appealing widescreen-like look, but you may wish to go with **493** which will give you the standard ratio for photographs (like 6x4in.). Click the **Next** button to advance to Step 2.

The screenshot shows the 'Editing Slideshow' page. The 'Slideshow Images' tab is active. The 'Slideshow Images' section has a yellow circle highlighting the 'Add an Image' button.

That will bring up the **Upload Slideshow Image** popup where we can choose from **Images in Library** that already match our **Dimensions** criteria, or **Upload an Image** where we'll have the ability to crop the image to our already set **Dimensions**. Assuming you do not already have images created, click on the **Choose File** button to upload and crop an image from your computer.

## 4. Home Page Slideshow

Repeat that last step until all of your images are uploaded and cropped. Then when you are in the **Images in Library** tab, you can tick the checkboxes next to each of the images you would like to add to this slideshow. Then click the **Insert** button to place them into the slideshow.

The screenshot shows the 'Editing Slideshow' dialog box. On the left is a sidebar with site navigation. The main area has tabs for 'Slideshow Settings' (selected) and 'Slideshow Images' (highlighted with a yellow circle). Under 'Slideshow Images', there's a section titled 'Add an Image' with a camera icon. Below it is a list of five images with their widths and heights: 'Width: 739px, Height: 457px', 'Width: 739px, Height: 457px', 'Width: 739px, Height: 457px', 'Width: 739px, Height: 457px', and 'Width: 739px, Height: 457px'. Each image has an 'Edit' link to its right. An orange arrow points from this list down towards the main content area, which shows a grid of image blocks that can be repositioned.

Now you should now see all of the images that you just selected and inserted from the previous step. Click and drag an image block item to reposition it.

**Save** **Cancel**

When you're all done adding **Title** and **Description** values to all of your slideshow images, click the **Save** button to go back to the main **Slideshows** interface.

## 4. Home Page Slideshow

The screenshot shows the 'Editing Page Template: home' interface. On the left, a sidebar lists various site sections like Home, Main Menu, and Content Pages. The 'Theme and templates' link is circled with a yellow '1'. The top navigation bar includes links for Dashboard, Website pages, File library, User admin, Email lists, News Desk, Store, and Settings. The 'Widgets' tab is selected and circled with a yellow '2'. In the main content area, there are several widget containers: 'Widgets - Hero unit' (with a 'Click here to add widgets' link circled with a blue '3'), 'Widgets - Callout large', 'Widgets - Leftsidebar' containing 'Accendam in corde tuo lucerum intellectus - Esdras', 'Blog Labels', and 'Slideshow' (which is also circled with a blue '3'), and 'Widgets - Content from widget'.

Navigate to the Themes and templates panel, click on the Widgets tab, and then click on the Click here to add widgets link inside the Widgets - Hero unit widget container. If a Slideshow widget is already placed here, don't add another. If you would prefer a full width image, you could instead choose the Banner Image widget.

This screenshot shows the same 'Editing Page Template: home' interface as above, but with a modal dialog open over the 'Widgets - Leftsidebar' container. The modal lists various widget types with checkboxes. The 'Slideshow' checkbox is checked and circled with a yellow '1'. At the bottom of the modal, the 'Add widgets' button is highlighted with a yellow '2'.

This will once again bring up the Widgets popup. Find the Slideshow widget in the list, tick its checkbox and click on the Add widgets button.

That will open up the **Customize the Slideshow Widget** popup. Click on the **Select a slideshow to display** dropdown and choose the slideshow we just created (e.g. mine was named “**Home Hero Slideshow**”).

Select your desired values for the options of **Select a slideshow effect**, **Select the slideshow speed**, and **Show navigation buttons on slideshow?** Either **Fade** or **Glide** is fine, we recommend at least 5 seconds per slide (more if you have longer text) and we also recommend that you **Show** the navigation buttons. When you’re ready, click the **Done** button to save your settings.

If you would prefer a widescreen image instead of a slideshow with captions, the banner image widget is a good option. We recommend you choose an image 1140 pixels wide.

Navigate to the Themes and templates panel, click on the Widgets tab, and then click on the Click here to add widgets link inside the Widgets - Hero unit widget container. Choose the Banner Image Widget and click add.

## 5. Home Page Banner Image

A screenshot of the netAdventist website editor. The top navigation bar includes "Welcome John, Logout | Help | My Account | View site | netAdventist terms of use". Below it are tabs for "Dashboard", "Website pages" (which is selected), "File library", "User admin", and "Settings". On the left, a sidebar for "jbtest4" lists "Home", "Main Menu", "Theme and templates", "Content Pages", "Announcements", "Calendar", "News", and "Slideshows". The main content area shows a "Editing Page Template: home" window. It has tabs for "Layouts" and "Widgets". Under "Widgets", there are sections for "Header", "Horizontal navigation", "Widgets - Hero unit", "Widgets - Content from widget above", "Content", and "Widgets - Content from widget below". In the "Widgets - Hero unit" section, there is a blue link "Click here to add widgets" which is circled in red.

Once you have added the Banner Image Widget, click on the blue link inside it to add images.

A screenshot of the netAdventist website editor showing a modal dialog titled "Customize Your Banner Image Widget". The dialog contains the following instructions: "Note: Each time this widget is shown, an image from the list below will be chosen at random to be displayed. The full resolution version of each image will be used, regardless of which size option is selected in the photo chooser." It has three input fields: "Image Clickthrough Link Alt Text" (with a small image icon), "How much padding (in pixels) should be around the displayed image?", and "How should the banner image be scaled?". The "How much padding" field has "0" entered. The "How should the banner image be scaled?" dropdown is set to "Stretch to fit". At the bottom are "Done" and "Cancel" buttons. The background of the editor shows the same "Editing Page Template: home" interface as the previous screenshot.

We recommend choosing to stretch the image to fit. When making images for this theme, we **1140 pixels wide** will work well. If you add more than one image, the system will randomly choose one of them each time the page is displayed. Click the **Done** button to save your changes.

## 5. Home Page Banner Image

Your homepage should now include a nice wide image.

## 6. Final Tweaks

### Page templates for this theme:

Each content page on your site has an associated layout. The layout is a combination of widget containers and page-specific content. When your site is built, there are two templates built: 1) Home page template, and 2) Default template. The default template is the template used for every page other than your home page until you build another template here. Click on the dropdown and add the appropriate template, click edit, select your preferred layout, and place your widgets. For an in-depth explanation of how themes, templates and layouts work, [Click here](#).

Custom template for:  Name:  Add a Template

| Template name | Layout details |  |
|---------------|----------------|--|
| default       |                | <a href="#">Edit template</a> <span style="color: red;">x</span> |
| home          |                | <a href="#">Edit template</a> <span style="color: red;">x</span> |

If you would like photos to display at the top of other sections of your site, navigate back to Theme and Templates and perform similar steps for the **default template**. You may also want to add other widgets to your site's sidebars.

Enjoy your beautiful new *netAdventist* website theme, part of the new Adventist.org corporate identity package.

## CHURCH CAMPOUT

Last year's Church Campout was a huge success and a good time was enjoyed by all. This year we will once again be camping on Lake Beautiful. Bring your friends, family, pets and camping gear!

## MY WHOLE LIFE

I was born to reflect the image of a God who is powerful enough to create my universe, attentive enough to hear my prayers and loving enough to be defined by self-sacrifice. I find my greatest fulfillment on a journey toward purpose and wholeness.

## OUR BELIEFS

Seventh-day Adventist beliefs are meant to permeate your whole life. Growing out of scriptures that paint a compelling portrait of God, you are invited to explore, experience and
